

Dental insurance is a valuable method of offsetting the costs associated with dental care. Unfortunately, dental plans are based on a contract drawn up between your employer and your insurance company and do not take into account your individual dental needs.

There are thousands of dental plans available. Our staff members do not have access to the details of your insurance plan. Although we do our best to provide you with estimates based on our past experience, we can never guarantee what your final cost will be.

The Canadian Privacy Act prevents us from accessing information about your plan directly. We rely on you for all information regarding your policy. We make note of specific limitations on your plan where possible, however insurance clauses and limits can change frequently and without notice.

To better assist us in estimating your costs as accurately as possible, please provide the following information:
